

## Unique MHR & SHLS

For a Bio-Compliant Climate Without Side Effects on Man Made Radiations

Our MHR & SHLS devices create a minimized electro-magnetic / oxidative stress on living things. They are leaned on electrotechnical hollow waveguides and for instance SMD's or el. circuits filled up with SiO<sub>2</sub> / carbon / metals etc.

Our passive systems are working as a broadband so called "wave swamp"

This patent appl. devices are recommended to neutralize bio-stress from common electronic EMF's powered by 50Hz/230V or 60Hz/120V or inside DC 12V cars, radiating wireless electronic devices or EMF field emissions from WLAN, Bluetooth, wireless / mobile phones (DECT base stations), computers/ laptops, radio relay or radar. Besides MHR's arrange a quicker dust particle drop off in the air.

Science honor by the German government / state of Bavaria 2016: It was sponsored our research project based on human cell tests due to EMF impact neutralization effects proof using MHR's and SHLS.

## COMPANY & TEAM

In 1990 was founded the "Florian König Enterprises GmbH" (\*www.fk-e.de), which was supported by the father of \*Dr. Sc. Florian M. König, Prof. Dr. em. Herbert L. König (Techn. University of Munich).

Meanwhile \*Dr. König created over 160 international patent applications first as one of the pioneers regarding head-related surround sound technology. He was the founder in 1990 and lead scientist of the ultrason.com, a company best known for manufacturing and sales of high-end 3D audio engineered headphones. Besides Dr. König was a popular speaker at international conferences for audio, medical applications and new (energy) technologies. In recent years Dr. König has been one of the leading comparative researchers for naturally occurring and artificially created electromagnetic fields; he's member for instance at www.icems.eu.

## SCIENTIFIC URGENCY

All living things are sensitive to naturally occurring electromagnetic fields. These can make us feel better--on a bright sunny day or after a thunderstorm--or they can make us feel worse, such as on an overcast day or from storm fields like the German "Foehn". Dr. König has studied these fields all over the world and has identified and isolated a variety of distinct signals produced by the earth itself and various weather patterns. In the last 100 years, artificially created electromagnetic wave emissions have become more and more powerful and widespread. Signals from cell phones, cell towers, wi-fi transmitters and high voltage power lines are "not 100% proven safe" and Dr. König, along with other noted scientists, are documenting negative health effects and stress-related disease correlations with these man made unavoidable electromagnetic fields (called EMF's). This EMF's are evolutionary unknown for our planets life.

\*Notes: The acquisition of the doctoral degree "Dr.Sc." is not common in Germany and was certified on a dissertation at an US University in 2004 (see www.fk-e.de). Additionally, a new edited 2021 published book called "THE MEANINGFULNESS OF NATURE-RELATED RADIATION FORMS AND RESULTING NEW TECHNOLOGIES"; e-book ISBN: 978-3-9823116-0-9 explains all technological background; more details see www.fk-e.de.

## ZERTIFIKAT · CERTIFICATE

**DARTSCH SCIENTIFIC GMBH**  
**Institute of Cell Biological Test Systems**  
 herewith certifies that the products named  
**Multiple chamber cavity resonators**  
**(MHR and SHLS)**  
 manufactured and distributed by  
**Florian M. König Enterprises GmbH, 82110 Germering, Germany**

have been tested for their potential to neutralise unwanted cellular effects of electromagnetic alternating fields as emitted by DECT phones.

### Test results

By using cultured connective tissue fibroblasts in several individual experiments with a variety of setups, we could demonstrate that the above mentioned multiple chamber cavity resonators are able to neutralise the cellular effects of emitted electromagnetic alternating fields up to 98 %. Thus, the devices can be recommended for individuals in order to reduce unwanted health effects of electromagnetic alternating fields emitted by devices such as DECT phones.
